The Ford escort Mk1 was first brought out in the late 60's and immediately became popular due to its unique looks, most notably its front grille which has a dog bone like shape. Another huge factor in its popularity is its high performance. Under the hood, you will find Kent Crossflow engine and eventually a 950 cc also became available. Because of its good performance on the road, it has become a favourite when it comes to road racing and rally racing. This constant battering would eventually take a toll on the Ford escort Mk1 brake pad. A brake pad plays an important factor when it comes to the braking system of any vehicle. It provides the ability to stop the vehicle for any reason. A good braking system should respond fast in order to avoid accidents. In other words, you should be able to trust your braking system when it comes down to the line and every split second matters. This is why it is important to constantly replace your Ford escort Mk1 brake pad. Since it has taken a lot of wear and tear due to racing and normal use, the pads would be thin and thus cannot perform at its maximum capacity. When it comes to braking systems, EBC Automotive brake pads has a lot to offer to replace your Ford escort Mk1 brake pad.
